OPERATION: STREET SMART

MORE INFORMATION:

The Franklin County Sheriff's Office created Operation Street Smart in July 2002 as a way to take community oriented policing to a new level. Street Smart is a collaborative effort between D.A.R.E. and the Special Investigations Unit (SIU), which is the Sheriff's Office undercover narcotics branch. Through the Franklin County Justice Programming Unit, grant funds were obtained to support this unique endeavor that is believed to be the first of it's kind in the United States.

The goal of Street Smart is to provide current and up-to-date narcotics information on trends, terminology, paraphernalia, and physiological effects to those individuals who deal with today's youth on a daily basis. The target audience for Street Smart includes D.A.R.E. and school resource officers, juvenile detectives, school administrators and school board members, teachers, and parents, as well as professionals who work in the substance abuse field.

Two current undercover detectives, who possess over thirty years of combined narcotics experience, conduct the Street Smart presentation. This four-hour program includes actual examples of current designer street drugs such as XTC, LSD, GHB, Ketamine, and Khat. D.A.R.E. officers escort the examples throughout the audience for hands on effect. Current drug paraphernalia examples are available to depict the ease in camouflaging drug use from adults. Great emphasis is placed on the physiological effects of the drugs and indicators as well as on the street/slang terminology used in describing drugs. So-called "traditional" drugs such as marijuana, cocaine, crack, heroin, and methamphetamine are also covered extensively as teenagers still heavily abuse these drugs. A portion of the program also deals with prescription medications due to the easy accessibility in most households. The entire presentation is back dropped by a PowerPoint slide show depicting additional examples of the drugs being shown.
